-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 8, 14-16, 18 and 19 have been rejected under 35 U.S.C. 102(b) as being anticipated by Pope, 2610879. Pope discloses a u-nut (has a u-nut shape in cross-section, 11, figure 2) made of plastic including a flex area (18). The term u-nut is considered to carry little weight since the body of the claim fails to refer back to the preamble for meaning. Furthermore, there are no recitations of threads, which are normally found on a nut, or anything else relating to a nut in the body of the claim. Pope also discloses the other limitations of the claimed invention as shown in the annotated figure.

Pope's device is also capable of performing all the functional recitations stated in the claims.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7 and 17 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Pope, 2610879. Pope discloses angled surfaces located at the end of the stems in figure 2. Pope fails to disclose an angled surface being at an angle of 45 degrees with respect to the stem. Pope's angled surface is curved to facilitate insertion of the retainer into the acceptor. Applicant's 45 degree angled surface serves the same purpose. Both surfaces facilitate the insertion of the retainer into the acceptor equally as well as the other. Therefore, it would have been an obvious design choice to use an angled surface having a 45-degree angle in Pope's device.

Allowable Subject Matter

5. Claims 2, 3, 5, 6, 9-13 and 20 have been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
